

CON-TROL-CURE®

STACKER/JOGGER

Smooth Production Material Handling with the Stacker/Jogger Unit.

This versatile unit stacks stock in small piles which are easy to handle and ship. It instantaneously and perfectly aligns all kinds and weights of paper, plastic and metals. The table can be used in a flat position or tilted to any position approaching 90°. Dependable, accurate and durable even under continuous round-the-clock usage. The optional brush transfer system allows lightweight sheets to be smoothly transferred from the conveyor to the jogger unit without falling between the two machines. The unit is constructed with a heavy duty guard for long life and durability. The Stacker/Jogger is easy to set up with adjustable guides which accommodates different stock.

BENEFITS:

- Quiet While Running
- Reduce labor costs
- Decrease rejects, waste and damage

STANDARD FEATURES:

- Conveyor Travel Direction Right to Left
- Manual Magnetic Adjustable Stops For Incoming Sheets
- Variable Adjustment For Vibration Speed
- Tilttable Table
- 2" Casters for easy movement
- Pile Capacity: 5" (Optional 6" or 7")
- 24" Overall Height
- Motor: 1/4 hp
- 0° to compound 45° Tilt

OPTIONAL ACCESSORIES:
